Why Test for HIV?

PROTECT YOURSELF

When you know your HIV status, you can know if you need treatment to live a healthier, longer life. You can also learn how to prevent catching it.

PROTECT YOUR PARTNER

Knowing your status helps you prevent spreading HIV to your partner by practicing safety measures and getting proper treatment while still being sexually active.

PROTECT YOUR BABY

Prevent spreading HIV to your baby through birth or breastfeeding by knowing your status and following your provider's treatment plan.

Confidential testing is at ASIA's International Community Health Centers!
